

Set Up E-mail on an Android Phone

For 1&1 e-mail accounts

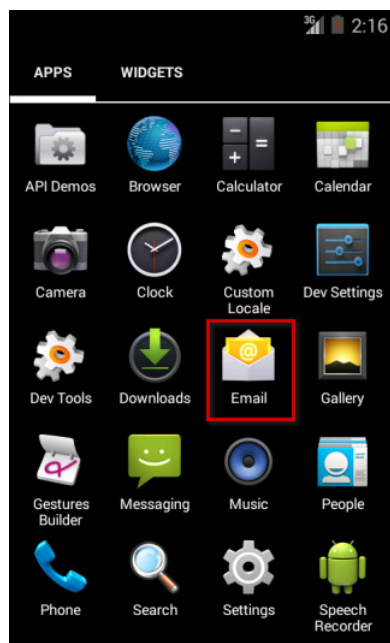

Learn how to set up your 1&1 e-mail account on your Android smartphone, allowing you to send and receive e-mails wherever you go.

The images used in this guide reflect Android OS 4.4 (KitKat).

Before you begin, you will need to [Create an E-mail Account in Your 1&1 Package](#).

Step 1

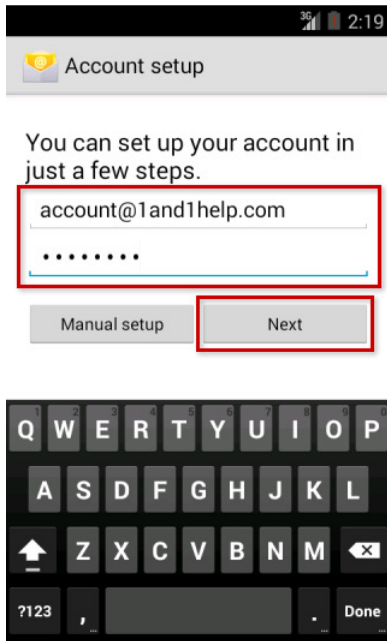

Find and click **E-mail** on your Android phone.

The Email icon is located on the apps page

Step 2

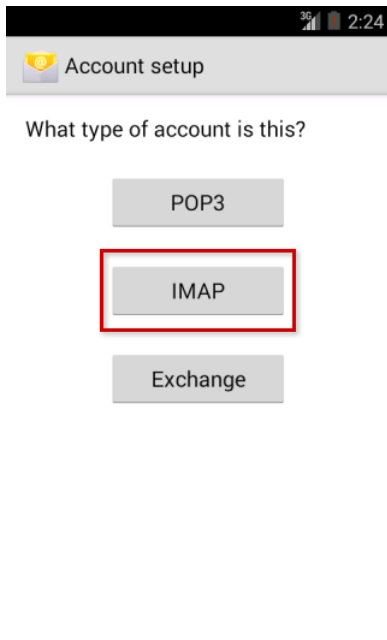

Enter your **e-mail address** and **password** and then press **Next**.

The basic settings screen

Step 3

Select **IMAP**.

The account type selection screen

Step 6

Give this account a name and enter **Your name**. It is suggested to use your e-mail address as the account name to differentiate it from any other e-mail accounts you may set up

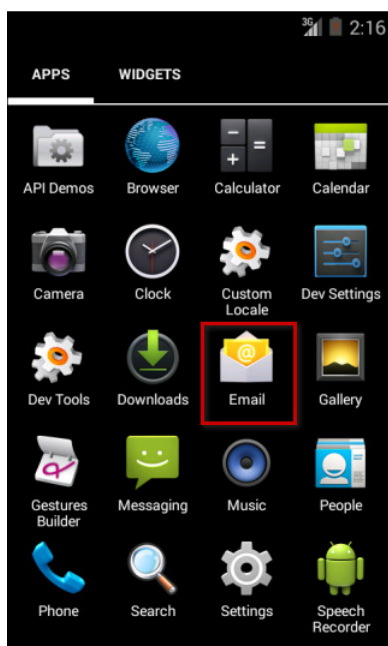

on your phone.

The final settings screen

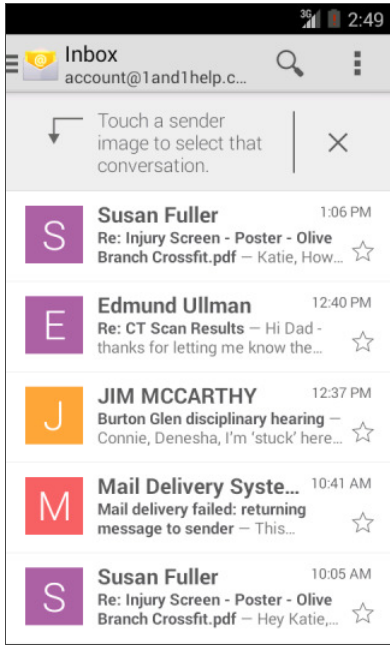

Step 7

You can now click the **Email** icon again to access your 1&1 e-mail account on your phone.

The Email icon is found on the apps screen

The setup is complete. Your phone should download and display your recent e-mails in the application.

Your e-mails are displayed
